Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 May 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. Due to Applicant's amendments, previous rejections of claims 15 and 18 under 35 USC 112 2nd paragraph, all previous rejections under 35 USC 112 1st paragraph, and all previous objections to the drawings and claims are hereby withdrawn.

Regarding claim 14, see ¶3.

Applicant's arguments filed 5/14/2007 have been fully considered. Applicant arguments regarding Mehrhoff are persuasive and are hereby withdrawn. Applicant's arguments regarding Branch are not persuasive. Applicant argues Branch does not disclose the claimed boom that extends transversely of the direction of conveyance of a feeder, or the claimed boom conveyor that conveys a piece of cloth across the boom in the longitudinal direction thereof where the piece of cloth stretches across the boom, or a turning device arranged between machine parts. In response, boom (88,90) extends transversely of the direction of conveyance of a feeder (30) and the boom conveyor conveys a piece of cloth across the boom in the longitudinal direction thereof where the piece of cloth stretches across the boom (see figure 1). Further, device (70) is a turning device arranged between machine parts. Its conveyors are defined in relation to a feeder (it is defined in relation to all its feeders).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14,19,21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites an angle between the direction of the first feed conveyor and the direction of conveyance of the feeder, however, the feeder has not been positively recited. It appears as though the entirety of the device is the feeder, and thus, reciting an angle between the feeder and first feed conveyor is indefinite.

Regarding claim 19, it is unclear what the extension element is. Does this allow the boom to longitudinally extend? Is the extension the boom itself?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 11-13,15,20 are rejected under 35 U.S.C. 102(b) as being anticipated by Branch USP 5,419,439.

Jensen discloses a device comprising:

- A boom comprising a boom conveyor (88,90)

- A feeder having a first feed conveyor (30)
- A first turning device (70) provided between the boom conveyor and the end of the feed conveyor opposite the feeding end
- A second feed conveyor (260) located at the opposite end of the boom and a second turning device (212) provided between the boom conveyor and the second feed conveyor
- Wherein each turning device, and boom conveyor are independent units comprising each their securing means and guide (fig.1)

Allowable Subject Matter

6. Claims 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3651

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
